Education

09/2019-06/2023	BSc in Math and Applied math, Shanghai Jiao Tong University, China
09/2023-06/2025	MSc in Neurobiology, University of Amsterdam, Netherlands
08/2025-08/2028 (expected)	PhD candidate, IMPRS Physics of Biological and Complex Systems, Germany

Research Interests

Theoretical neuroscience: multi-scale modeling, statistical physics, nonlinear dynamics, self-organization in biology, neural field theory.
Imaging neuroscience: optical imaging, functional ultrasound imaging.

Professional Experience

09/2021-09/2022	Bachelor Assistant, Shanghai Jiaotong University Supervisor: Prof. Songting Li, Prof. Douglas Zhou
09/2022-07/2023	Research Intern, U. Amsterdam Supervisor: Dr. Jorge Mejias
07/2023-08/2024	Research Intern, Centre de Recerca Mathematica Supervisor: Dr. Alex Roxin
09/2024-06/2025	Hybrid Research Intern, U. Amsterdam & U. Chicago & German Primate Center Supervisors: Dr. Jorge Mejias, Dr. Jorge Jaramillo, Dr. Igor Kagan
06/2025-08/2025	Visiting Researcher (summer), NYU Shanghai Supervisor: Dr. Zhuo-Cheng Xiao
08/2025-Now	Doctoral Researcher, Max Planck Institute for Dynamics and Self-organization Supervisor: Prof. Fred Wolf

Publications

- **Representational drift as the consequence of ongoing memory storage**
  Federico Devalle, Licheng Zou, Gloria Cecchini, Alex Roxin
  Nature Scientific Reports, 2025

- **Synaptic plasticity facilitates oscillations in a V1 cortical column model with multiple interneuron types**
  Giulia Moreni, Licheng Zou, Cyriel Pennartz, Jorge Mejias
  Frontiers in Computational Neuroscience, 2025

Preprints

- **Distributed evidence accumulation across macaque large-scale neocortical networks during perceptual decision making**
  Licheng Zou, Nicola Palomero-Gallagher, Douglas Zhou, Songting Li, Jorge F Mejias
  bioRxiv, 2023

- **Efficient laminar-distributed interactions and orientation selectivity in the mouse V1 cortical column**
  Licheng Zou, Giulia Moreni, Cyriel Pennartz, Jorge Mejias
  bioRxiv, 2024

Presentations

- *Highly distorted three-dimensional orientation fields in primary visual cortex*, Poster, Bernstein 2026, Frankfurt
- *Highly distorted three-dimensional orientation fields in primary visual cortex*, Poster, Workshop 'Cortex Structure and Function in Mouse, Monkey and Man', Delmenhorst
- *Highly distorted three-dimensional orientation fields in primary visual cortex*, Young Scientist talk, Neurizon 2026, Göttingen
- *Large-Scale Long-term Circuit Optimization Predicts Focal Areas High Speed Tuning Drift in V1*, Blitz Talk, The 5th Göttingen Neural Networking Day, Göttingen
- *Computational mechanisms of representational drift and odor perception in rodent olfactory systems*, Poster, Bernstein 2024, Frankfurt
- *Computational mechanisms of representational drift and odor perception in rodent olfactory systems*, Poster, Barccsyn 2024, Barcelona
- *Representational drift as the consequence of ongoing memory storage*, Poster, Cosyne 2024, Lisbon
- *What's going on in representational drift*, Conference talk 20 mins, Donders Discussion 2023, Nijmegen

Workshop Attendance

- 2026 Eresfjord School in Mathematical Methods for Computational Neuroscience, Eresfjord, Norway
- 2025 CNeuro summer school, Shanghai, China
- 2024 Cold Spring Harbor Asia summer course, 'Computational and Cognitive Neuroscience', Suzhou, China
- 2024 EBRAINS brain simulation workshop, Bilbao, Spain
- 2024 Hybrid workshop BCN, 'From EEG and related potentials to connectivity and source modeling', Barcelona, Spain
- 2022, 2023 SJTU computational neuroscience winter school, Shanghai, China

Service

Reviewer for *Physical Review E*

Languages

Chinese (native), English (fluent), German (basic), Spanish (basic).
